CAREER SUMMARY

Dedicated and detail-oriented Java Fullstack Developer with a solid foundation in both frontend and backend development. Currently seeking a full-time opportunity at FPT Software to contribute effectively as a core team member. Passionate about building scalable web applications, continuously improving technical skills, and committed to long-term growth within the company—especially aiming to contribute to FPT’s global projects, including future opportunities at the South Korea branch.

PROFESSIONAL PROJECTS

● Employees Management

FPT Software Academy

06.2025 – Present

Developed a human resources management web app to manage employee records, user accounts, and departments. Built core CRUD operations, login authentication, and data validation using Spring MVC and Hibernate in a layered architecture. Used Thymeleaf for dynamic UI and JDBC for direct DB access.

Achievements:

- Built employee CRUD with Spring MVC & Hibernate
- Implemented login validation and role-based access control
- Added pagination and search using Thymeleaf & SQL Server

Technologies:

Java

Spring MVC

Bootstrap

Thymeleaf

Hybernate

SQL Server

JDBC

● ChatBot for Universities

Phenikaa University

09.2023 – 10.2023

Developed a ChatBot system for universities as part of a group project, utilizing Python, LangChain, and Flask. Contributed to the design and implementation of the software while ensuring seamless backend integration and database management.

Achievements:

- Designed key features, managed team collaboration.
- Integrated SQL backend.
- Delivered functional prototype.

Technologies:

EDUCATION

FPT Software Academy

12.2024 – Present

Fresher Java Developer

Phenikaa University

08.2021 – Present

Bachelor's degree, Information Technology

GPA: 3.25/4

FPT Aptech Education

02.2021 – 11.2023

Advanced Diploma In System Engineering (ADSE)

CERTIFICATE & AWARD

Award

3rd Prize Open Source Software 2023

3rd Prize ICPC 2021

Encouragement Prize OLP 2021

Certificate

English Communication for Tech Professionals

Project Management

Scrum Master Profession

Agile Development and Scrum

Python

Langchain

Flask

SQL

Forestry Administrative Violation Support System

Phenikaa University

05.2023 – 06.2023

Developed software application as part of the .NET Technology course, leveraging C# and XAML. Contributed to the conceptualization, design, and development of the application while managing the project workflow and ensuring robust backend integration.

Achievements:

- Designed core functionalities.
- Managed project milestones.
- Integrated backend services.
- Delivered a polished application.

Technologies:

C#

XAML

.Net FrameWork

Financial Flow Management

FPT Aptech Education

05.2023

A project using Java Swing to create a graphical user interface (GUI) for a desktop application. Designed and implemented user-friendly interfaces, focusing on smooth interaction and performance. Integrated various components to ensure the application met personal requirements and functionality needs.

Achievements:

- Developed a fully functional Java Swing application
- Created a user-friendly interface with smooth navigation
- Optimized application performance for efficient task handling

Technologies:

Java

Swing

Extended Bin Packing Problem

Phenikaa University

04.2023

Developed a project for the Applied Algorithms course, utilizing C++ and the Nearest Neighbor algorithm to solve optimization problems. Implemented the algorithm to efficiently find the shortest path in various scenarios, ensuring accuracy and performance.

Achievements:

- Implemented Nearest Neighbor algorithm
- Achieved accurate and efficient pathfinding results
- Demonstrated algorithm's effectiveness in various test cases

Technologies:

C++

Algorithm

Project Lifecycle, Information Sharing, and Risk Management

Project Management Foundations, Initiation, and Planning

SKILLS

Frontend:

- HTML/CSS/JavaScript/Angular
- Bootstrap/ Tailwind CSS/ jQuery

Backend:

- Java/Spring Boot/Spring MVC/Swing
- .NET Core/C#
- PHP
- C/C++
- RESTful API Design

Mobile Development:

- Flutter/Dart
- Xamarin/.NET MAUI
- Java (Android)

Other:

- SQLServer/MongoDB/Firebase
- Docker/AWS/Microsoft Azure
- Microservices Architecture
- Unit Testing (JUnit, Mockito)

LANGUAGE

English – Toeic 450

Korean – Topik 2
